

PRUNE TREE NAMED "D6N-72"

ABSTRACT OF THE DISCLOSURE

A new prune cultivar designated 'D6N-72' has been developed. The new cultivar is the result of a cross between 'Improved French' and 'Tulare Giant.' The fruit of this cultivar are large, light purple to light bluish purple in color and covered with a grayish waxy bloom. The 'D6N-72' tree is productive and a regular bearer.
